## SPRING ASSIST

Your drivers may pull and lift their walk ramps dozens of times a day, and that can mean serious driver fatigue. That's why we were the first to develop the patented Spring Assist™ system for our Rollaramp® walk ramps. With the Spring Assist system, drivers can easily lift ramps to bed height – making light work of walk ramps.

The unique construction of extruded aluminum with interlocking panels makes Spring Assist heavy duty and TODCO tough. It gives you a lightweight walk ramp with heavyweight strength and durability.

The Spring Assist system is easy to retrofit to existing Rollaramp walk ramps. Contact TODCO for more information and instructions. See back side for details.
